THE STORM

The Storm
A 3-point ditcher for small surface drainage and irrigation ditches.

Ditcher Features

Every Hurricane Ditcher is manufactured using the highest quality components and expert craftsmanship.

Impeller Wheel

To cut down on the shock and vibration, the 8" impeller wheel is uniquely designed with three T1 cutting paddles and three cleanout paddles. The 12" wheel has four of each paddle.

Drag Plate

The drag plate is formed to the size of the impeller wheel to prevent ditches from collapsing. It also prevents gouging and promotes smooth ditcher operation.

Idler

The gearbox is equipped with a double 60 roller chain, runs in an oil bath, and has a manually adjusted idler for chain tension. The PTO is shear bolt protected.

Ditcher Specifications

- Requires 30 to 100 HP.
- Equipped for 540 or 1000 PTO.
- Adaptable to Cat I or II quick hitch.
- 8" or 12" impeller wheel.
