*"In Fall of 2020, we ditched over 1800 acres
with one man and one machine which would
not be possible without the Revolution Ditcher!"*
- Mark H. of Roseau, MN

REVOLUTION DITCHER™

GET TO KNOW THE NEW BEAST ON THE BLOCK

The Revolution Ditcher by Cray® is setting the standard for moving dirt to create and/or maintain waterways, ditches and terraces. Efficient water management of your field increases yields and profits. The 5-foot flat bottom leaves a smooth finish allowing equipment to pass through with ease. No one field is the same – the ability to throw dirt in both directions is a huge benefit. If you are looking to park your old scrapers, graders and bulldozers to avoid piles or huge lumps of dirt to work down... check out the Revolution Ditcher and cut the time in half to create or maintain the perfect ditch, terrace or waterway!

- Capable of working with most GPS/laser control systems on the market.
- Clutch-protected driveline and gearbox.
- One tool that cuts like a scraper and moves dirt like a blower.
- 5' flat-bottom cut up to 10" deep.
- HD 6.5' diameter rotor designed for rock and high volume throughput.
- Integrated PWM valve and control box for all functions.
- Bolt-on replaceable wear parts.
- Standard auto-level.

INDUSTRIAL SPEC & EFFICIENT PLANETARY GEARBOX IS HEAVIEST IN THE MARKET.

1. 80mm (3.15 inch) input shaft.
2. Easy-access drain plug.
3. Shielded cooling fan provides increased continuous power rating and extended life.
4. Vented fill cap for increased durability.
5. 100mm (3.94 inch) output shaft.

MADE IN USA

Throws dirt up to 165'.

Hydraulically adjustable dirt deflector.

Windrow close to machine.

Automatic tilt-control.
